

Hi, I'm Ciprian Platica!

Experience

Kuende Front-End Developer (Backbone and Marionette written in Coffeescript)

Job description: Front end development for the small social media platform, working alongside a team of designers, product owners and developers, in a really collaborative and fast paced environment.

We used model-view-controller architectural pattern. Backbone helped us out with the models and collections. Marionette is a framework based on Backbone which has views and collection views with very handy life-cycle methods. It also has a router linked to a controller so when a route is matched a method of the controller is executed. For persistence we used a RESTful API and we had to design the structure of the requests and responses. Because we wanted a clean code without parentheses, braces or semicolons we chose coffeescript and stylus and it was a pleasure to them. We also had to concatenate all the files in a single file based on dependencies, we used Require.js with Gulp to build and deploy the app. We created a Node.js server with Express for development only, so we could test our APIs and the UI with Selenium and Intern.js.

jan 2014 - oct 2016

ARI Love Full-Stack Developer (React and Node.js written in ES6)

Job description: Front end optimisation for the ARI Love platform, rewriting the homepage codebase to move to a responsive layout and increase the loading time. As a side project I've worked on the Settings page UI and backend.

feb 2016 - apr 2016

XL Team Full-Stack Developer (CSS, Javascript and Wordpress)

Job description: Focusing on front-end development while collaborating tightly with the design team and client side. The work can range from presentation websites to CMS admins or gantt charts.

jun 2014 - jan 2015

Rainbow Intermed E-Commerce (CSS, Opencart, Wordpress)

Job description: Streamlining and refactoring the flow for our online store, while helping the client increase traffic and improve conversion.

feb 2014 - jun 2014

Euroconcept Design E-Commerce (CSS, Opencart, Magento)

Job description: Managing and customising Wordpress themes for e-commerce websites, mostly for small businesses and startups, while also taking care of the SEO side.

oct 2013 - jun 2014

Proseo E-Commerce (CSS, Whitehat and Blackhat SEO, Google Analytics/AdWords)

Job description: Customising the Wordpress theme for the company's e-commerce website, maintaining the high quality and output. In the process of doing that I've also added backlinks on our directory platforms in order to improve the search ranking.

oct 2012 - aug 2013

Skills

JavaScript:

Langs: CoffeeScript (2 years), ES6 (6 months)

Frameworks: Backbone.js with Marionette.js (2 years), React.js (6 months)

Node.js: Express, Amazon Web Services, Google Cloud Platform

Module bundlers: Require.js with Gulp, Webpack

CSS:

Langs: Stylus, Less, Sass

Frameworks: Bootstrap, Materialize.css

Methodologies: BEM, SMACSS, OOCSS, ACSS

CSS Modules

HTML:

Langs: Handlebars, Jade

HTML5

PHP

WordPress

OpenCart

Magento

MySQL

Github

Design:

Photoshop

Sketch

Illustrator

Avocode

Education

Bachelor degree in Mathematics and Computer Science

Faculty of Mathematics and Computer Science,

University of Bucharest, Romania

2012-2016

"Mihail Kogalniceanu" High School,
Galati, Romania

2008-2012

Projects
